Nothing Found

Your search for +author:edwin +author:iliff did not return any results.

You may want to try an Advanced Search for additional options.

Please review the Quick Tips below or for more information see the Search Tips.

Quick Tips

- Enter your search terms in lower case with a space between the terms.

  sales offices

  You can also enter a full question or concept in plain language.

  Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

  John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

  "museum of natural history" "museum of modern art"

- Narrow your searches by using a + if a search term must appear on a page.

  museum + art

- Exclude pages by using a − if a search term must not appear on a page.

  museum −Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

  museum + "natural history" dinosaur −Chicago

81 Knowledge acquisition for classification expert systems
William J. Clancey
January 1984   **Proceedings of the 1984 annual conference of the ACM on The fifth generation challenge**
Publisher: ACM Press
Full text available: m4N255.02 KB)   Additional information: full citation, abstract, references, index terms

Expert systems are generally described by a mixture of terms that confuse implementation language with knowledge structure and the search process. This confusion makes it difficult to analyze new problems and to derive a set of knowledge engineering principles. A rigorous, logical description of expert systems reveals that a small set of terms and relations can be used to describe many rule-based expert systems. In particular, one common method for solving problems is by classificat ...

82 Pre-selection of independent binary features: an application to diagnosing Scrapie in sheep
L. I. Kuncheva, C. J. Whitaker, P. D. Cockcroft, Z. S. J. Hoare
July 2004   **Proceedings of the 20th conference on Uncertainty in artificial intelligence AUAI '04**
Publisher: AUAI Press
Full text available: pdf(393.19 KB)   Additional information: full citation, abstract, references

Suppose that the only available information in a multi-class problem are expert estimates of the conditional probabilities of occurrence for a set of binary features. The aim is to select a subset of features to be measured in subsequent data collection experiments. In the lack of any information about the dependencies between the features, we assume that all features are conditionally independent and hence choose the Naive Bayes classifier as the optimal classifier for the problem. Even in t ...

83 Searching and organizing: Strategy hubs: next-generation domain portals with search procedures
Suresh K. Bhavnani, Bichakjian K. Christopher, Timothy M. Johnson, Roderick J. Little, Frederick A. Peck, Jennifer L. Schwartz, Victor J. Strecher
April 2003   **Proceedings of the SIGCHI conference on Human factors in computing systems**
Publisher: ACM Press
Full text available: pdf(2.51 MB)   Additional information: full citation, abstract, references, citings, index terms

Current search tools on the Web, such as general-purpose search engines (e.g. Google) and domain-specific portals (e.g. MEDLINEplus), do not provide search procedures that guide users to form appropriately ordered sub-goals. The lack of such procedural knowledge often leads users searching in unfamiliar domains to retrieve incomplete information. In critical domains such as in healthcare, such ineffective searches can have dangerous consequences. To address this situation, we developed a new typ ...

84 Obsolescence and self-assessment
Paul Armer
June 1972   **Proceedings of the tenth annual SIGCPR conference**
Publisher: ACM Press
Full text available: pdf(253.82 KB)   Additional information: full citation, abstract, citings, index terms

I want to talk to you about a problem which I believe deserves the attention of each of you as individuals and of SIGCPR as a group. You might think of it as a health problem. The disease at issue is an insidious one—many who have it are completely unaware of their illness. Many who have
